Subject: M/041/004 Western Clay's Limestone Pit

I called Brad Boyter today to remind him that we could not calculate a new bond on this property until a new map of the area is received.

A request was made on February 19, 2001 for this map and we have not received it yet. Lynn and I have visited the site on June 19, 2001 with Wally Curtis. Lynn had released some historic areas at that time.

Areas that had become overgrown since mining had ceased were also released.

Brad indicated that he would have Wally get the map to us as soon as possible.
